

Course name	Basics on Care Work: Techniques
Course Number	CE31641
Credits	1.0
Year	2 - 4
Term, Weekday and Period	Fall A Intensive
Instructor	Minoru YAMADA
Course overview	The course will enable students to learn not only nursing care skills, but also summarized knowledge necessary for medical/nursing workers. For instance, ordinary people may not know how to care persons with Parkinson's disease. Or, they do not know how to help persons who cannot raise their arms to change clothes. Taking this course will not provide students with an immediate solution, but provide them with an opportunity and material to consider solutions. The course will encourage students to learn diseases, disabilities, and cares together.
Remarks	In principle, the course is limited to the students who learned the Basics on Care Work: Theories in advance. The course is equivalent to CE31241 in FY2012 or earlier. The course is held in every two years (odd year). October 10 and 17, from 2nd to 6th periods Details will be informed later.
Teaching method	Lecture
Attainment target	Students will be able to learn the nursing care techniques, such as communication (the way people relate), observation and assessment, development of living environment (including hygiene), welfare equipment use, and basic skills of movement and transfer.
