With sincere welcoming to Prof, K. Anders Ericsson, we have a special symposium about **Verbal Protocol Analysis** as a methodology, and Experts studies in the real world, especially in work contexts.

The purpose of this symposium is twofold: First, we would like to share states of art about knowing expertise in work contexts. And secondly, we would like to discuss about how we, research experts, can succeed our own methodologies and skills to capture experts in the real world to the next generation of researchers and practitioners.

In addition to Prof. Ericsson's talk, three distinguished researchers in Japan, with different methodologies in different fields, will present their studies on experts in work contexts. All speakers will tell us about how they are trying to train and groom successors of their approaches, too.

All talks and discussion will be conducted in English. Anyone who are interested in

those research fields and studies can attend the symposium. For the convenience of registration, please let us know your name and contact points in advance, though e-mail.

Speaker:

K. Anders Ericsson (Florida State University)

Deliberate Practice and the Future of Education

Takashi KUSUMI (Kyoto University) & Masako ITOH (Tokiwa University)

Tacit knowledge and expertise in salespersons and managers

Nozomi IKEYA (Keio University)

Facilitating learning and communication through 'patterns of work'

Hirromichi HOSOMA (The University of Shiga Prefecture)

Body Method of Interpretation: Multimodal Interaction Among Caregivers in a Group Home for the Elderly

- Talks and discussions will be presented in English.
- Fees are free for everyone.
